

# The Future of School Funding in Pennsylvania: How the BEF Commission can shape it

Deborah Gordon Klehr Education Law Center

Public Interest Law Center

## Low-Wealth Districts Cannot Provide the Resources Students Need

The evidence demonstrates that low-wealth districts like Petitioner Districts, which struggle to raise enough revenue through local taxes to cover the greater needs of their students, lack the inputs that are essential elements of a thorough and efficient system of public education – adequate funding; courses, curricula, and other programs that prepare students to be college and career ready; sufficient, qualified, and effective staff; safe and adequate facilities; and modern, quality instrumentalities of learning.

## **Cause and Effect**

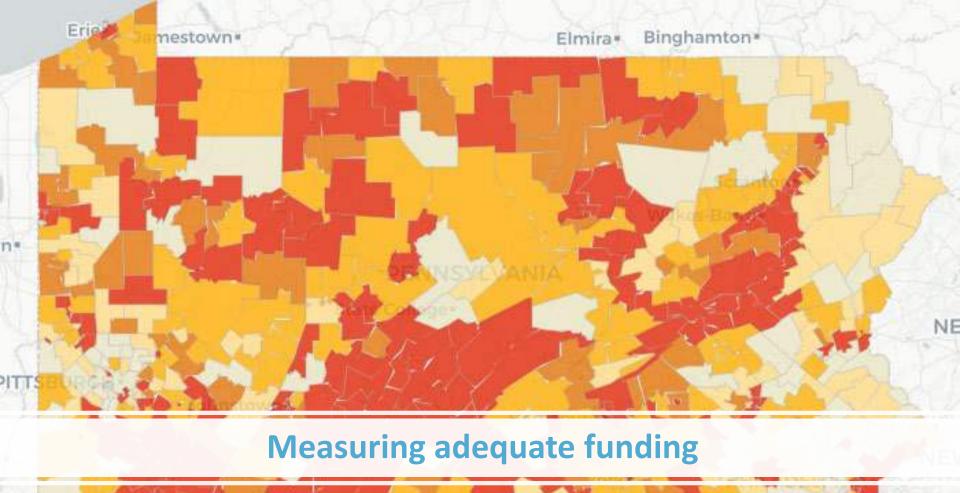

Based upon the evidence presented, it is evident to the Court that the current system of funding public education has disproportionately, negatively impacted students who attend schools in low-wealth school districts. This disparity is the result of a funding system that is heavily dependent on local tax revenue, which benefits students in high-wealth districts. (FOF ¶¶ 293, 295, 379.) It is also impacted by a funding formula that does not adequately take into account student needs, which are generally higher in low-wealth districts. (See, e.g., FOF ¶¶ 824, 1702.) As a result, students in low-wealth districts do not have access to the educational resources needed to prepare them to succeed academically, socially, or civically.

## The Path to Constitutional Compliance

- Evaluate all major funding needs: basic education, special education, facilities, CTE, and Pre-K
- Develop a formula to determine how much each school district needs to provide a constitutionally compliant system
- 3. In 2024-25, enact legislation to meet these adequacy targets in short order, and in every year thereafter

## **Measuring Success**

Pennsylvania Department of Education > K-12 > ESSA > ESSA Report Card > Goals and Interim Targets

## **Goals and Interim Targets**

Pennsylvania's proposed long-term goals apply to all public schools and to each student subgroup.

Pennsylvania aims to reduce, by half, the statewide percentage of non-proficient students on state assessments by the end of the 2032-33 school year. This timeline will allow academic planning and programming to support a cohort of students across the full span of their public education experience, from kindergarten through grade 12.

## **PDE: Achievable Goals**

- 4 Q. Do you believe these goals are
- 5 achievable?
- 6 A. I do.
- 8 THE WITNESS: Can I make a -- I just
- 9 want to answer one of your questions with a
- 10 little bit more nuance.
- When you ask if the goals are
- 12 achievable, yes, the goals are achievable; but we
- 13 would make the claim that more resources are
- 14 needed for school districts to achieve those
- 15 goals. So the goals are achievable, but it's
- 16 -- the department would make claim that more
- 17 resources are going to be needed to achieve those
- 18 goals.

## The operating costs of a district

### **Current Expenditures**

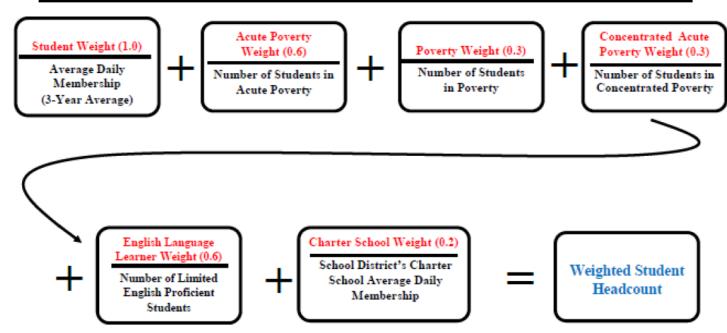

- Line 1000 (instruction, i.e., teachers)
- Line 2000 (support, i.e., counselors and principals)
- Line 3000 (non-instruction, i.e., sports and extracurricular activities)
- Lines 4000-5000 (facilities)

## **Need Based on State Weights**

#### Weighted Basic Education Student Headcount Equation

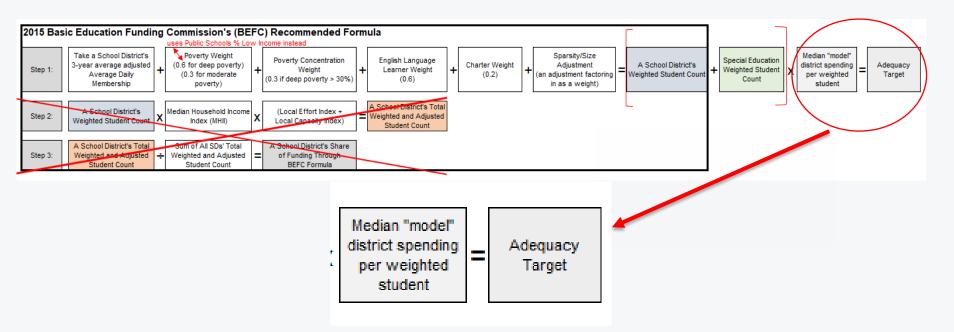

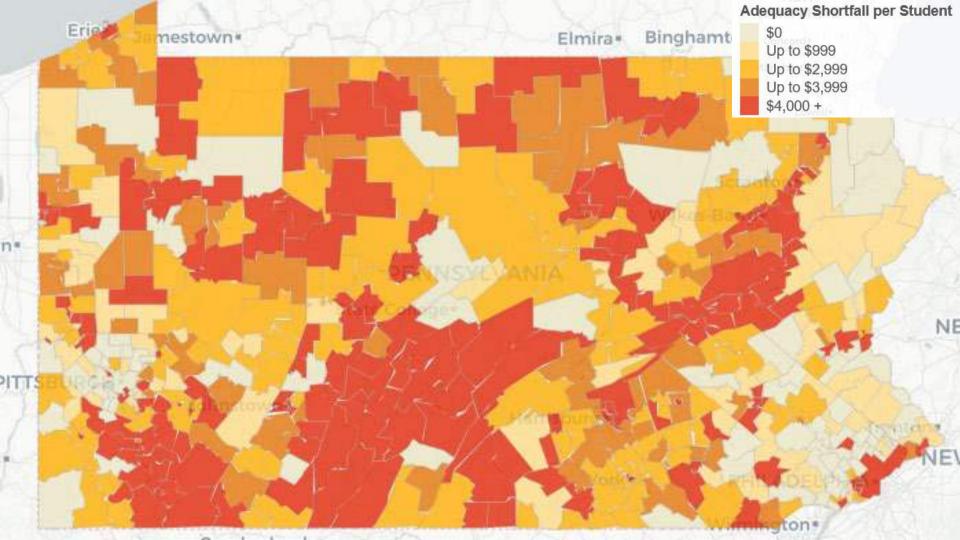

## **Need Based on State Weights**

Reccomended Weighting Factors							
Category	A۱	erage Cost	Weight				
Regular Education	\$	7,140					
Category 1	\$	11,677	1.64				
Category 2	\$	35,920	3.08				
Category 3	\$	74,031	6.34				

### The Formula

Aggregate shortfall: \$6.2 billion

## Principles for a funding solution

- Permanently fill long-standing adequacy gaps in a timely way
- Robust state share no increased tax effort in low wealth districts
- Equitably distributed fund those farthest from adequacy
- Build on existing formulas for BEF/SEF
- No redistribution of existing BEF funds

## **Constitutional shortfall funding**

### The Plan for Constitutional School Funding

- Adequacy Number or Distribution formula
- Four or five-year time frame
- Legislative language establishing permanence
- Include pre-K and facilities

## Large Amounts of Consensus

In its evaluation, Attorney General argues the Court must consider the inputs, as well as the outputs. (*Id.* at 42, 44.) When the evidence presented is considered, Attorney General asserts the fundamental elements of a thorough and efficient education are not provided. (*Id.*) Among the inadequacies Attorney General identifies are large class sizes, a shortage of certified teachers, curricula not aligned with state standards, a lack of advanced educational opportunities, and an inadequate number of counselors, social workers, reading specialists, and tutors, to name a few. (*Id.* at 42-44.) Attorney General claims the effect of these inadequacies is evidenced in the low levels of proficiency on the PSSA and Keystone Exams and lower graduation rates. (*Id.* at 45.)

## Make the promise a reality

All witnesses agree that every child can learn. It is now the obligation of the Legislature, Executive Branch, and educators, to make the constitutional promise a reality in this Commonwealth.

RENÉE COHN JUBELIRER, President Judge
